

THE FALLOW SPINE · Emergence Morphology

Conceptual suggestion for professional deepening
Land use is tissue, not zoning. Landmarks are accretions.
Five generators: trace, threshold, decay, human-review gate, hybrid metabolism.

铁路遗迹脊 Railway remnant spine 城市基底 Urban context 蓝绿脉络 Blue-green veins 组织簇 Morphological clusters

Five local rules (trace / threshold / decay / human-review gate / hybrid metabolism) grow one mile of tissue along the Jing-Zhang remnant.
五条地方规则（痕迹 / 阈值 / 衰减 / 人审门 / 混合代谢）沿京张遗迹生长出一英里组织。

02 用地结构·组织分化
Land-use Structure · Tissue Differentiation

■ 栖息组织 Habitat tissue

■ 表型 / 市集组织 Phenotypic / market tissue

■ 代谢组织 Metabolic tissue

■ 蓝绿脉络 Blue-green veins

■ 闲置 / 回退 Fallow / decay

Adjacent tissues meet as membranes, not cadastral lines. Unused tissue decays back to field.
相邻组织以膜交接，不是产权红线。空置组织按规则衰减回场地。

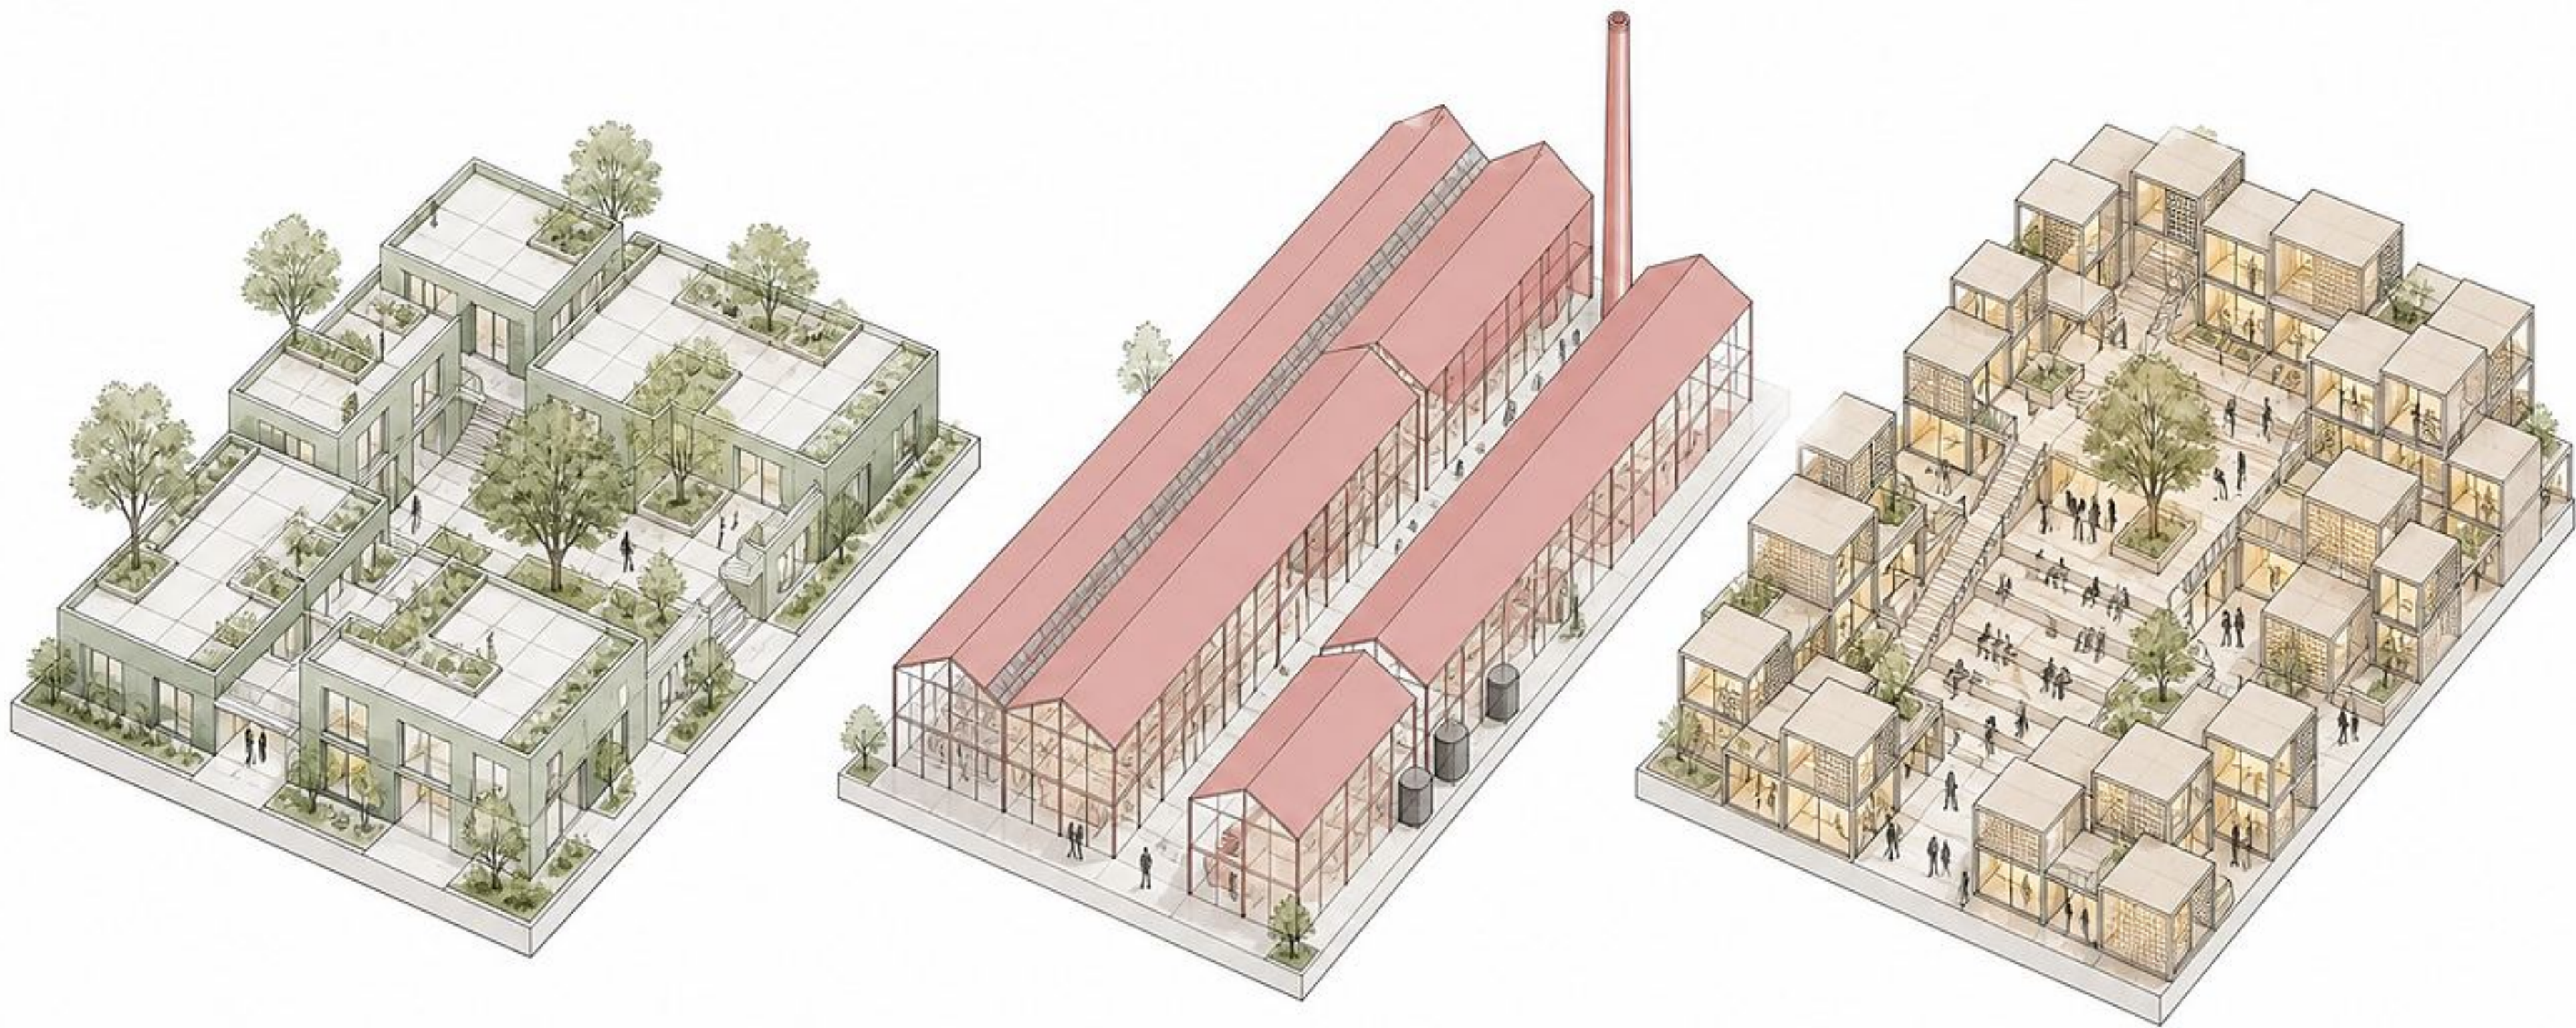

Morphological organs

Origin habitat, Zhongzhiyuan metabolism, Dazhongsi phenotype.

表型市集 Phenotypic market

Three organs of one rule set, not three masterplans. Conceptual suggestion for professional deepening.
三区是同一规则集的三种分化，不是三套总图。可供专业团队深化。

Flows and veins

Desire lines, stormwater veins, weak railway memory.

04 慢行与蓝绿·痕迹成网
Mobility & Blue-Green · Traces into Network

铁路遗迹 Railway remnant 植被廊道 Vegetal corridor 水体脉络 Water veins 欲望线 / 稳定路径 Desire lines / stabilized paths

Repeated passage thickens paths; rain and Xiaoyue River form veins. The railway is a terrain bias, not an approved alignment.
重复通行使路径加厚；雨水与小月河形成脉络。铁路是地形偏置，不是已定线位。
